

PIPER

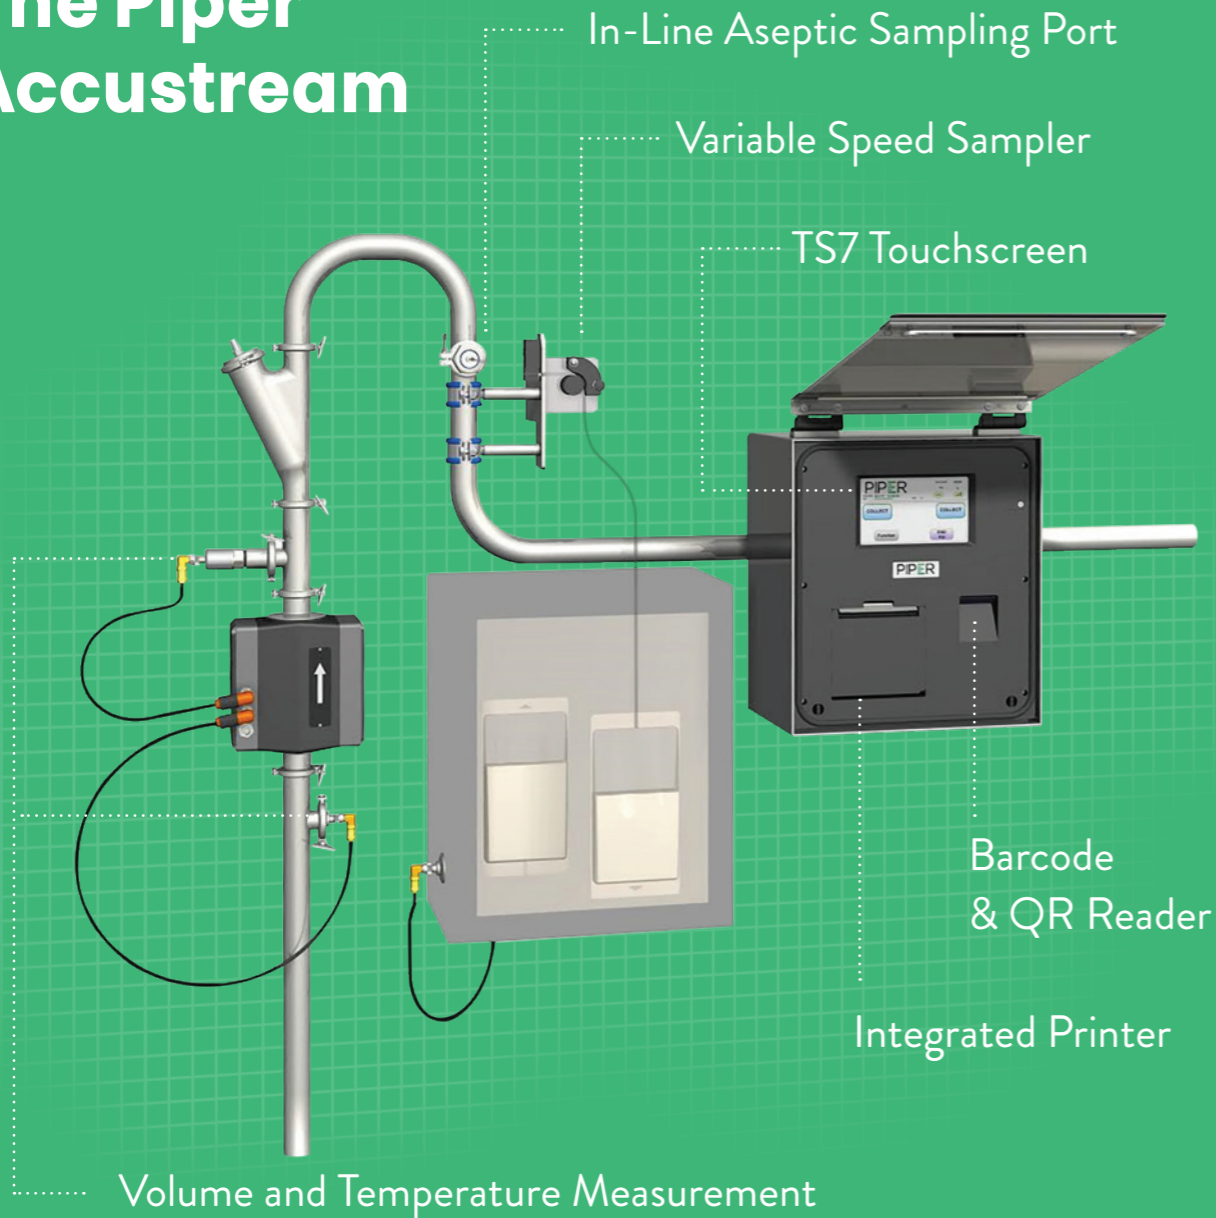

EVERY PRECIOUS DROP

PIPER ACCUSTREAM
EFFICIENT DIRECT LOAD METERING,
SAMPLING & TRACEABILITY

Improving efficiency
and accuracy, load after load.

The Piper Accustream

In-Line Aseptic Sampling Port

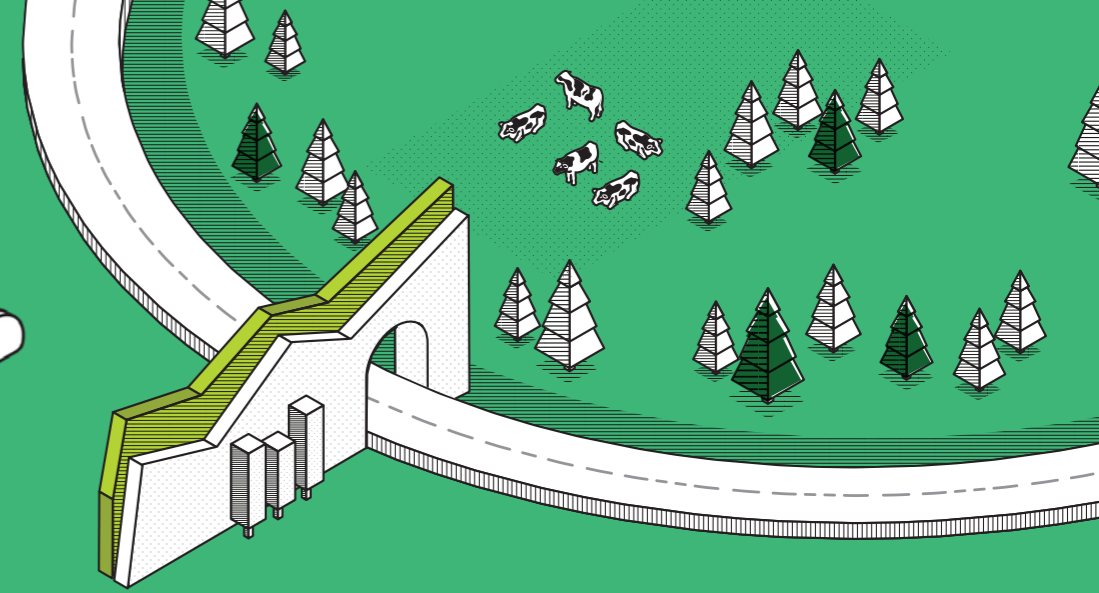

Variable Speed Sampler

TS7 Touchscreen

Barcode & QR Reader

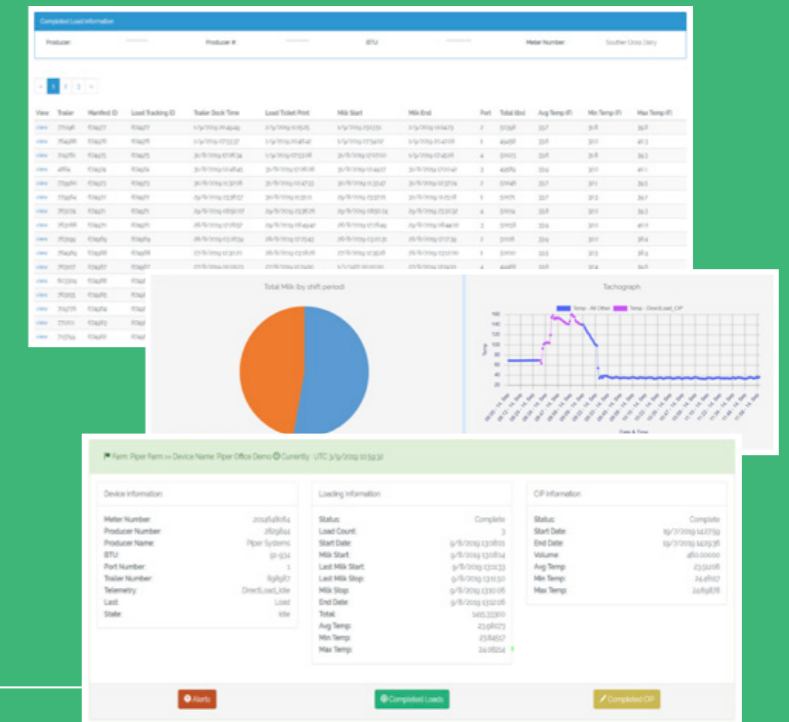

Integrated Printer

Volume and Temperature Measurement

Piper Portal

The Piper Portal gives real time data about loading, delivering improved operational control, monitoring and alerts.

Piper versus other Direct Loading Solutions

Features	Piper	Others
Accurate Weights & Temperatures	✓	Some
Fully Representative Samples	✓	✗
Alerts	✓	✗
CIP Monitor & Reports	✓	✗
Remote Monitoring & Troubleshooting	✓	✗
No interference with milking system	✓	✗

How Producers get Payback / ROI

- Avoid Rejected Loads
- Fair payment for milk produced
- Achieve quality bonuses with Representative Sampling
- Better Operational oversight for everyday efficiencies

Testimonials

Producers

"We installed a Piper AccuStream two years ago. We get consistently accurate weights and we can get paid off our meter. Piper sampling means our sampling is fully representative of our high quality and high volume cows, meaning we can hit our quality bonus too."

Steve Kayhart, VT

"We get reports of production, shift productivity and CIP. We get alerts for key milking events by email or text message. We can even create reports for regulatory requirements." **Dave Temple, FL**

Installers

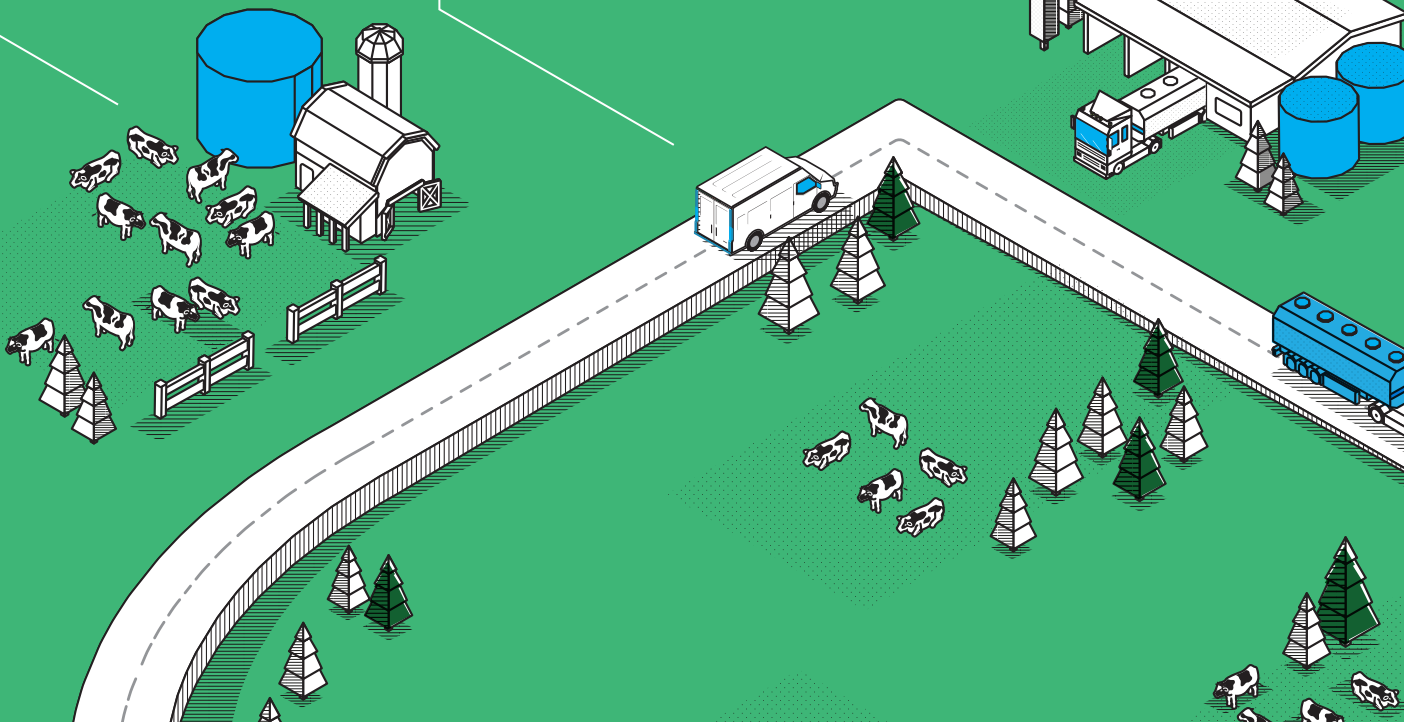

"I recommend Piper to Producers considering Direct Load because it's easy to install, robust and reliable, and gives me remote troubleshooting capability."

Todd Reed, VT

Processors

"The system lets us log in remotely and see what is happening on farm. It gives us greater capability to quickly identify issues, which improves our operational efficiency."

Brent Bunce, Dean Foods
